Energy Management System

ABSEY
Energy Management System

Welcome to ABSEY EMS, where we revolutionize energy management with cutting-edge software solutions. Our Energy Management System Software is designed to empower businesses to take control of their energy usage, optimize performance, and drive sustainability.

Features:

- **Real-Time Monitoring:** Monitor energy consumption in real-time, enabling proactive decision-making.

- **Customizable Dashboards:** Tailor dashboards to your specific needs for quick insights into energy usage trends.

- **Energy Usage Analytics:** Gain deep insights into energy consumption patterns and identify optimization opportunities.

- **Integration Capabilities:** Seamlessly integrate with IoT devices, existing systems, and third-party platforms for enhanced functionality.

- **Energy Efficiency Recommendations:** Receive actionable recommendations to improve energy efficiency and reduce costs.

- **Renewable Energy Integration:** Support for integrating renewable energy sources into your energy management strategy.

Open Platform Communications

Absey OPC Server is a Windows ® application software for PCs that converts the communication protocol between multi-vendor devices and control applications without proprietary restrictions.

Data Collection: Collect energy usage data from various sources, including meters, sensors, and IoT devices.

OPC Server

Industrial Connectivity Solution

Why We Are Best !

- Advanced dashboard with analytics.
- Customizable Solutions based on user requirement.
- Advanced OPC server.
- Integration Flexibility.
- One time license, No yearly charges.
- Live support.
